

INNOVATIONS AS A DRIVER

THE KEY OF OUR BUSINESS, SERVING YOUR COMFORT

BLUECONTROL SYSTEM

BLUETOOTH CONTROLS FOR TELESCOPIC STRAW BLOWERS: **BlueControl**

Fingertip control!

The state-of-the-art **CHARGER** telehandler straw blower with **BlueControl** control (standard) is designed to make the farmer's job easier: all the hydraulic and electrical functions of the straw blower are controlled with the fingertips, directly from the cab of the telehandler.

Get the most out of your telescopic handler!

EASIER TO USE

// The box plugs directly into the 12-volt outlet in the cabin. The controls are intuitive, and the box is ergonomic, for simplified use and maximum comfort.

TIME SAVING

// Quickly installed in the cab; no need to run electrical cables. The farmer can concentrate on his work without worrying about cables or hoses.

LOW MAINTENANCE

// The control box remains permanently in the cab of the telescopic handler, protected from humidity; maintenance of hoses and cables is greatly reduced.

LIMITED SPACE REQUIREMENT

// The electrical cables that usually connect the machine to the telescopic handler's cabin are eliminated; maneuvering is greatly facilitated.

STANDARD EQUIPMENT FOR:

STRAW BLOWERS
TX27XL CHARGER // STANDARD
