

# INNOVATIONS AS A DRIVER

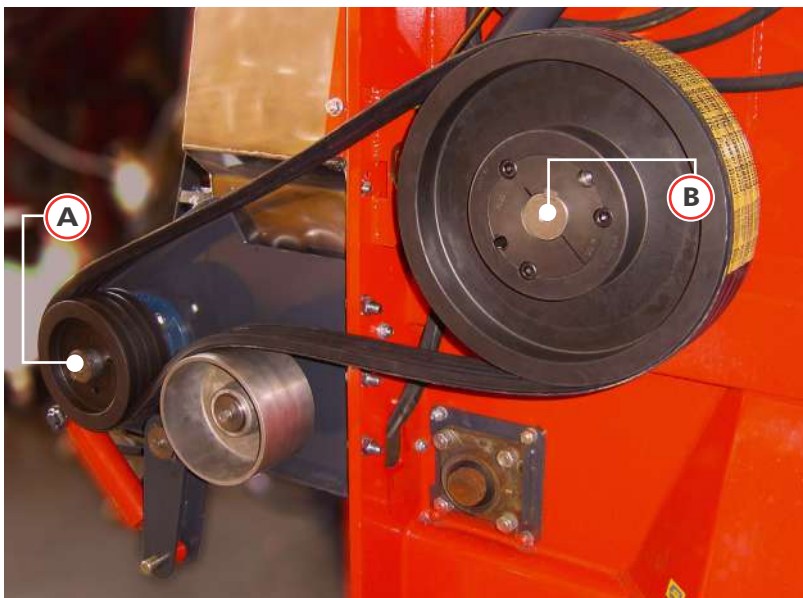

THE KEY OF OUR BUSINESS, SERVING YOUR COMFORT

## MOVING FLOOR *REGULATOR*

MOVING FLOOR REGULATOR, FOR JAM DETECTION

*Automatic fluidity!*

Optional, this major innovation has been rewarded by many fairs for its comfort. **THE MOVING FLOOR REGULATOR** automatically handles the belt speed in order to avoid jams, without human intervention needed.

Emplacements des capteurs : **poulie A et B**

AN **ANTI-JAMMING SYSTEM** THAT  
IS NOW MORE THAN **15 YEARS OLD**.

### WORKING PRINCIPLES:

#### ULTRA RÉACTIVE

// Thanks to its sensors facing pulleys, it detects slippage's beginning in **1/100th second: much faster than human eye could.**

#### AUTOMATISÉE

// Information is transmitted to an electronic automaton, which instantly sends it to the solenoid valve controlling the hydraulic motor to reduce the forward speed.

#### EFFICACITÉ GARANTIE

// The belt speed reduced, distributed materials' flow slightly diminished, suppressing clogging. The automaton notices the clogging stopped and it reestablishes the normal speed of the belt.

OPTIONAL EQUIPMENT, AVAILABLE FOR :

#### STRAW BLOWERS

TX47-57-67-87-107XL-TX137-157-177XL

#### SILAGE FEEDERS - STRAW BLOWERS
